

Office attendance review

July 2026

Review recorded office days, approved leave and the checks needed before making policy decisions.

Source rows

days

Median office days

4.5

days

Recorded approved leave

3

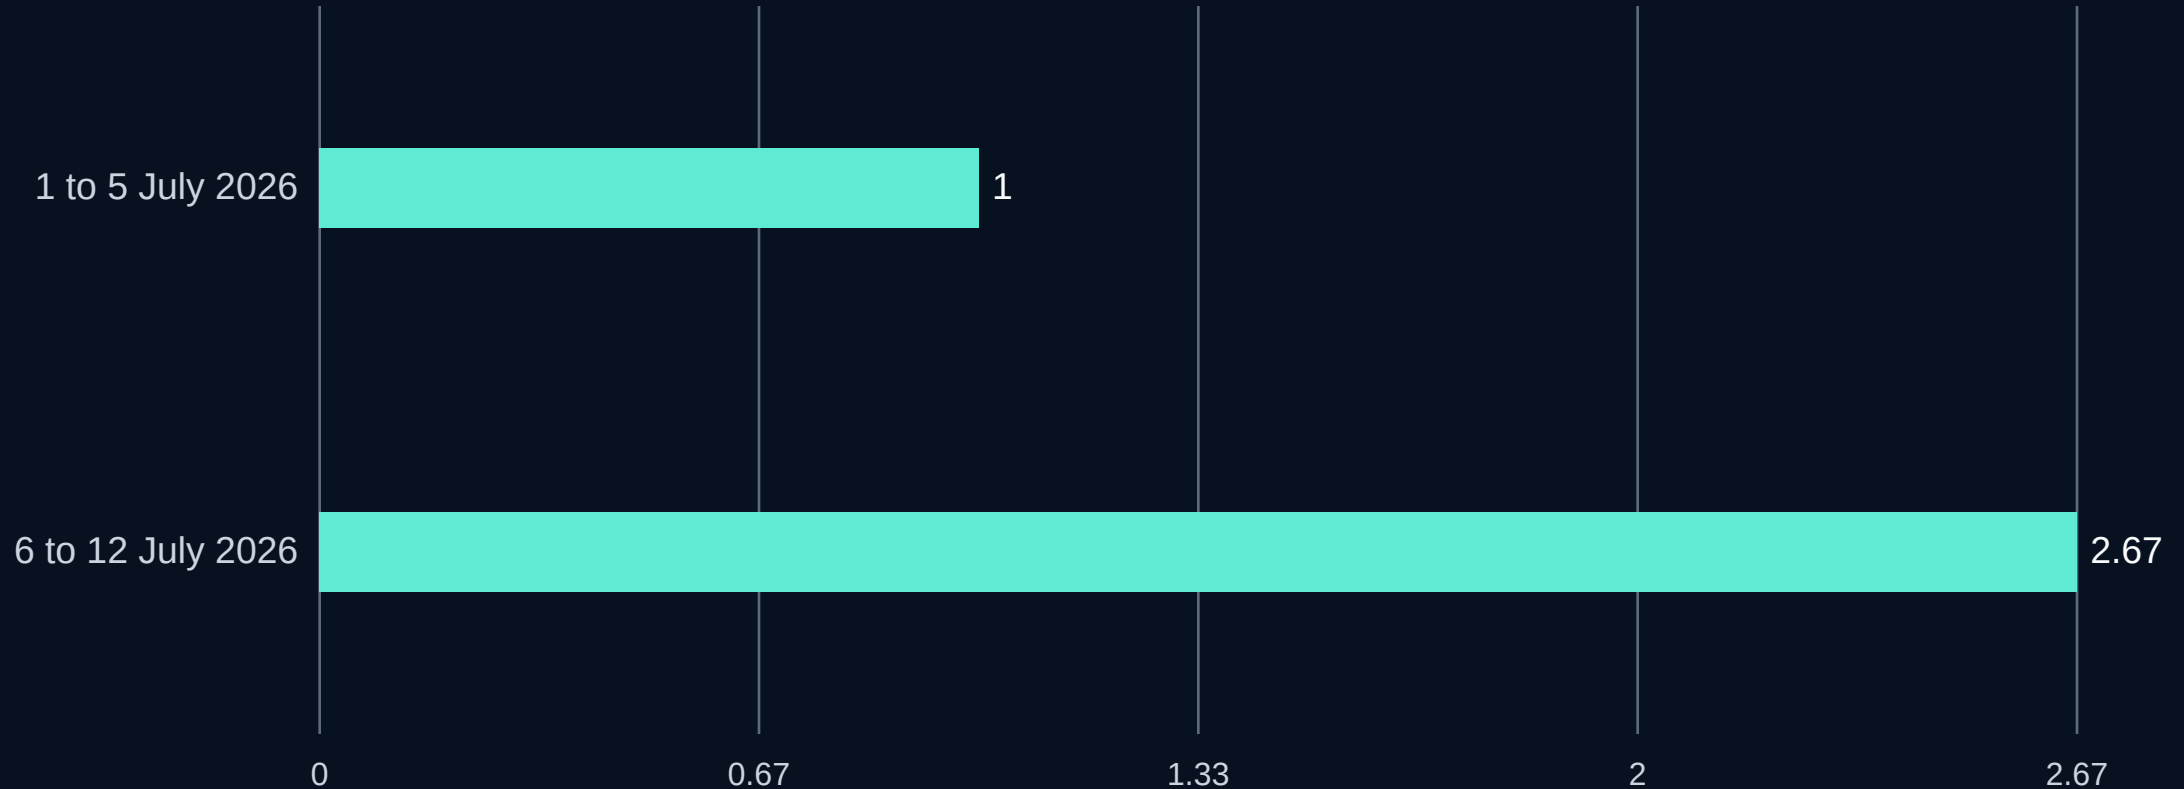

days

- The figures describe recorded attendance; they do not establish policy compliance.

Office days across the recorded weeks

Weekly averages use employees with a recorded attendance value in each week.

Average office days per employee

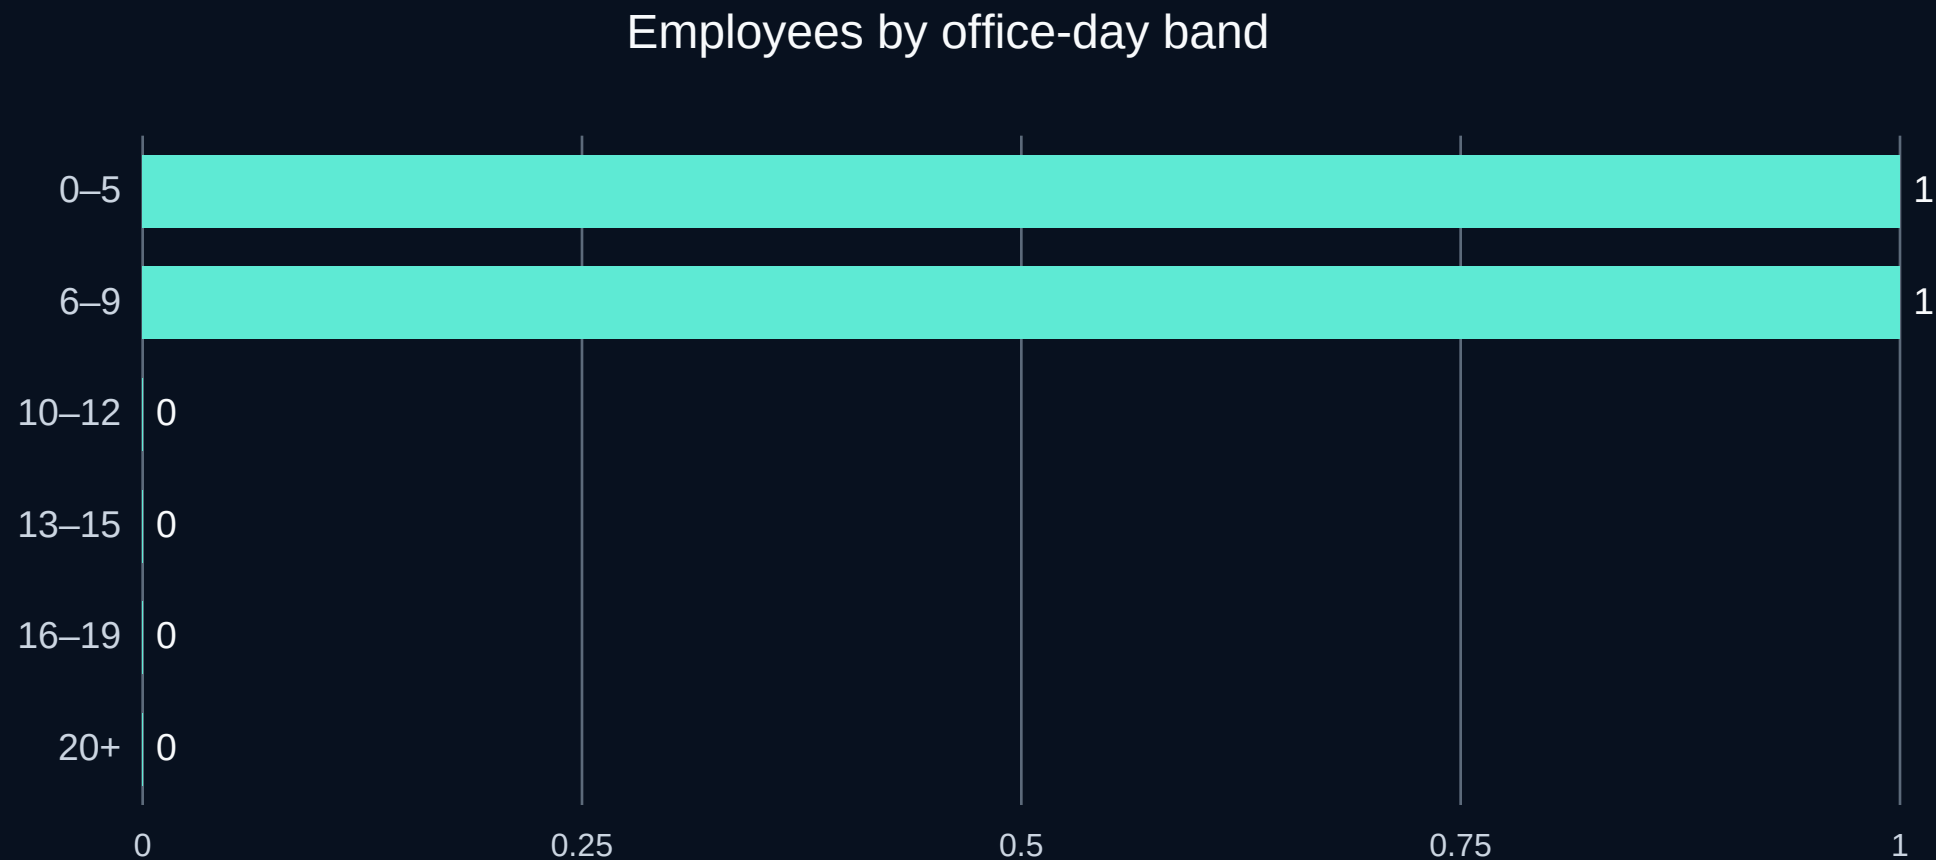

Office days by department

Compare department averages alongside the number of employees with recorded attendance.

Department	Employees	Avg office days	Recorded employees
Design	2	3.00	1
Operations	1	6.00	1

How recorded office days are distributed

The bands show recorded office days, without classifying employees as compliant or non-compliant.

Attendance entries that need checking

These are source checks for HR review, not conclusions about individual employees.

Check	Affected rows or employee IDs	Follow-up
Missing office-day value	1	Confirm the source value; it is not treated as zero.
Final attendance equals office days minus leave	001, 002	Check for double subtraction if office days already exclude leave; confirm policy first.

Do weekly entries agree with monthly totals?

Only rows with every required value are included in these checks.

Check	Matching rows	Checked rows	Meaning
Office-day totals	2	2	Weekly sum agrees with monthly total

What HR should confirm next

July 2026

Use the recorded attendance for discussion, then resolve definitions before making compliance decisions.

- Confirm the WFO requirement and working-day calendar.
- Confirm whether leave is recorded in calendar days or working days.
- Check flagged entries and the final-attendance formula.
